

Fathima NR

Full Stack Developer / IT Specialist

Dubai, United Arab Emirates | +971 50 592 4872 | fathimanr27@gmail.com | linkedin.com/in/fathimanr

PROFESSIONAL SUMMARY

Full Stack Developer with over three years of experience building web applications end to end, from responsive interfaces to REST APIs and databases. Designed and delivered two production platforms, a multi-role telehealth operations system and an internal HR and employee management portal, using Next.js, React, Node.js, Express and MongoDB, alongside hands-on experience across .NET/C#, SQL Server and modern frontend frameworks including Angular. Combines development with hands-on IT operations covering system administration, user and email management and network support. Comfortable owning a feature from requirements gathering through deployment and user support. Seeking a full stack development or IT operations role in Dubai.

TECHNICAL SKILLS

Frontend: React.js, Next.js, Angular, TypeScript, JavaScript (ES6+), RxJS, Redux, Redux Toolkit, Context API, React Hooks, Framer Motion, HTML5, CSS3, SCSS/SASS, Tailwind CSS, Bootstrap, jQuery, Responsive Web Design, Component Library Development, Atomic Design, UI Optimization, Accessibility/WCAG

Backend: Node.js, Express.js, C#, .NET, .NET 8, ASP.NET Core, .NET Framework, PHP, REST API Design and Integration, Worker Services, Webhooks, JSON, Socket.io, JWT Authentication, Role-Based Access Control

Databases: MongoDB, SQL Server, T-SQL, MySQL, Dapper, Entity Framework Core, Stored Procedures, Database Design, Query Optimization

Architecture: Clean Architecture, Repository Pattern, SOLID Principles, Modular Monolith, Multi-Tenant SaaS, Authentication and Authorization, RBAC, Refresh Token, API Architecture, Reusable Components, Component Libraries

Security: OWASP Practices, XSS Prevention and Remediation, SQL Injection Prevention, Secure Authentication, Role-Based Authorization

Testing and Quality: Jest, Unit Testing, API Testing, Swagger/OpenAPI, Debugging, Code Review, Error Handling, Technical Documentation, Coding Standards

DevOps and Development Tools: Git, GitHub, Azure DevOps, IIS, Webpack, NPM, Yarn, VS Code, Vite, Postman, Vercel

WordPress and Web: WordPress, WooCommerce, Elementor, Divi, Webflow, Odoo, PHP Templating, Child Theme Development, Plugin Integration

SEO and Performance: Technical SEO, On-Page SEO, Core Web Vitals, Page Speed Optimization, Lighthouse, Image Optimization, Lazy Loading, Asset Minification, Cross-Browser Compatibility

IT and Systems: Windows Setup and Configuration, User and Email Administration, Microsoft 365, Network Troubleshooting, IT Asset Management, Vendor Coordination, End-User Support

PROFESSIONAL EXPERIENCE

Full Stack Developer and IT Specialist

January 2026 - Present

Medcare Telehealth (US-based healthcare company), Dubai, UAE

- Designed and built an internal HR and employee management portal in Next.js covering attendance and shift schedules, biometric punch records, leave and public holidays, expense approvals, departments, inventory and equipment assignment.
- Developed multi-role portals for the Uber Health telehealth platform serving nurses, call centre agents, case workers and administrators, managing patient records, scheduling and care coordination workflows.
- Implemented real-time call requests and notifications with Socket.io, and secure authentication and role-based access control with JWT across all portals.
- Built REST APIs in Node.js and Express against MongoDB, and responsive front ends in Next.js, React and Tailwind CSS.
- Built and maintained the corporate websites medcare.org and careconnex.com on WordPress, covering theme customisation, page builds, plugin setup and content updates.
- Gathered requirements from HR, operations and clinical teams, then delivered and iterated on both platforms based on user feedback.
- Handled day-to-day IT operations including device setup, user account and email administration, network troubleshooting, IT asset management and vendor coordination.

Web Developer

August 2023 - December 2025

Techcybe IT Solution, Dubai, UAE

- Developed responsive client websites using HTML, CSS, JavaScript and React.js, ensuring cross-device compatibility.
- Built reusable components and maintained state logic using React Hooks, Redux and Context API.
- Integrated REST APIs, managed data flow and updated the UI based on API responses.
- Converted Figma and Adobe XD designs into pixel-perfect pages in collaboration with design teams.
- Debugged UI issues and improved page performance through clean, optimised code.

KEY PROJECTS

Uber Health - Telehealth Operations Platform

Technologies: Next.js, React, Node.js, Express, MongoDB, Socket.io, JWT, Tailwind CSS

- Full stack telehealth platform that helps Medicare patients check Annual Wellness Visit (AWV) eligibility and connects them with agents, nurses and case workers for scheduling, care coordination and follow-ups.
- Built role-based portals for patient intake, lead management, nurse visits, CHI and SDOH assessments, task workflows, training, payouts, and admin monitoring and analytics.
- Implemented real-time call requests and notifications with Socket.io and secure auth flows across the agent, nurse, case worker and admin applications.

Employee and HR Management Portal

Technologies: Next.js, Node.js, Express, MongoDB, Tailwind CSS

- Admin console for creating and managing portal users, departments, roles, shift schedules and working days.
- Attendance tracking with biometric fingerprint punch records, live user reporting, public holiday management and expense request approvals.
- Inventory and equipment module for recording company assets and assigning them to employees.

Corporate and Client Websites

Technologies: WordPress, React.js, JavaScript, REST API

- medcare.org and careconnex.com, corporate sites built and maintained including theme customisation, responsive layouts, plugin configuration and content updates.
- Client sites delivered at Techcybe: vedalink.com, hadi.com, thearchbeauty.com, saharahomests.com, altayseerpharma.com.

EDUCATION

Bachelor of Engineering (B.E.), Computer Science Engineering

June 2017 - April 2021

JP College of Engineering, India - CGPA 7.9 / 10

CERTIFICATIONS AND TRAINING

MERN Stack Development - MongoDB, Express.js, React.js, Node.js

Dec 2023 - Jul 2024

Live Wire Institute
